# Working together

---

## Working with you and for you

Our business is based on great design, quality components and engineering, craftsmanship and support. We believe our customers deserve the best products and service, so that's what we deliver.

Fabricators choose PatioMaster again and again. We reduce their stockholding costs and smooth their workflow, supplying everything their customers need.

Installers choose PatioMaster for quality that stands out, easy installation, trouble-free operation and the wide choice of configurations and colours.

Everybody loves our framework of local suppliers and our trusted national brand.

We're responsive, friendly and always perfectly in tune with the market.

In summary, we tick every box.

**And that's our promise.**

## The PatioMaster team

### We have a different approach

We don't believe that you should have to choose between dealing with a local, independent business or reaching for the reassurance of a national brand. With PatioMaster, you get the benefits of both ways of working.

#### Our dealer network

Up and down the country are expert fabricators dedicated to the manufacture and supply of outstanding sliding doors. Each of our local branches has been carefully selected for their skill and commitment to outstanding customer service. Only the best suppliers have what it takes to represent the PatioMaster brand and its high standards.

Working with a local supplier is great for installers or for fabricators reluctant to disrupt their production with sliding door orders. Our local team knows your area and its challenges. Give them the chance to get to know you and their support will strengthen your business.

#### Our head-office team

Our dealer network is supported by a head-office team which specialises in design, technical advice, specification help and marketing strategies. This ensures consistency, cutting-edge products, new routes to new markets and all the benefits of a clearly recognisable and respected brand.

PatioMaster is part of the Epwin Group of companies, which has more than forty years' experience in low-maintenance building products. What's more, we're British and proud of it.

# New Triple-track

---

## NEW Triple-track system

Our new triple-track system is a superb and practical solution where space is of the essence. These multi-sliding doors take up less room than doors with hinged sashes, and with sliding panes that neatly stack behind each other when opened, you get a wider clear opening. What's more, as larger panes are possible, there's more glass area and reduced framing to impede your view. If that isn't reason enough to take a closer look at our new system, consider these other benefits:

- Multi sliding of 3 or 6 panel door
- Maximum aperture width up to 6 meters
- Choose from up to 28 colours and finishes, including grained and flat textures
- Choice of handle colours: white, gold, brass, chrome, black and silver
- Secure system and doors are very easy to glide open
- Up to 25% additional open space compared to conventional simple sliding, enhancing visual appearance
- 6 point locking system for outstanding security on all standard specifications

**In short: it looks great, it performs brilliantly and there's one to suit every home and budget.**

# We're more colourful

## This spring we've added more colour options to the PatioMaster range

We're now offering 10 colours and finishes direct from stock, including two new ones that are proving very popular with the style-conscious consumer:

- Black Brown finish on both sides on a dark brown substrate
- Anthracite Grey finish both sides on a dark brown substrate.

Those who love the classic Cream Décor finish will be pleased to hear it's now available on a cream base direct from stock. What's more, our sash meeting profile is now available in our full range of foiled finishes.

### Fast and colourful

White doors are normally available within just 5 working days, but if you're looking for colour, you won't face a long wait. Our stocked colours have a 10-day lead time and we operate a no minimum order quantity policy for non-stocked colours.

**In other words – more options, more perfect finishes.**

---

# More good NEWS

---

## We've got a brand NEW outer frame

Our new, patio outer frame has been designed to suite with all our current and future window and door systems. With a flush internal face and a revised 70mm depth back edge detail, the lines are better than ever. If you are using a 70mm system you will find the new outer frame a perfect match.

### More NEW ancillaries

We've expanded the range of ancillaries and standardised them. The result – more flexibility for less stockholding and a perfect fit with no hassle.

### NEW colour-matched accessories

Colour is a huge trend in the market, so we've added more colour-matched accessories to the range, including our interlock and bump stop.

### NEW products mean NEW possibilities

We believe the new PatioMaster offering represents an outstanding opportunity.

All the new products, ancillaries and options are in stock now, and our team are ready to help.

**We're ready for the future. Why don't you come and join us?**
