

Technical Bulletin Cream & White PX Foils

SPECIFIC PRODUCT	DOCUMENT CATEGORY	DATE		REV.	REFERENCE	PAGE
VARIOUS	PRODUCT CHANGE	JUL	2016	0	T1607	01

As part of our policy of continuous product improvement we are pleased to announce a change to our Cream & White PX foils. This change is to improve the processability of the product and therefore improve the foiling of details on the profiles. This change does not affect any other aspect of the foil with the colour, gloss level and emboss remaining the same. As such the new foils are compatible with previously supplied product. The warranty for the new foil also remains at 15 years.

To allow for traceability the swatch references for the foils have changed from 46848 & 46849 to 47848 (Cream) & 47849 (White). However where our parts currently show 46848 & 46848 in the part number this will remain unchanged due to the complexity involved in changing.

MANUFACTURE

No Change.

AVAILABILITY

These new foils are available now and are being applied to all new manufacture parts.

REDUNDANT STOCKS

As the new foils are compatible with the previous foils we are not anticipating any redundant stock.

PRICE

No Change.

Should you require any further information or clarification, please contact your Customer Services Advisor or the Technical Department.
